

SMS and EBIZ Announce Exclusive Partnership to Deliver End-to-End IBM Maximo Solutions

GORHAM, ME - February 24, 2026: STRATEGIC MAINTENANCE SOLUTIONS INC.

(SMS) and **EBUSINESS STRATEGIES LLC (EBIZ)** today announced an exclusive strategic partnership designed to deliver unmatched value to organizations leveraging the IBM Maximo product suite. Together, SMS and EBIZ provide clients with comprehensive, end-to-end expertise spanning real estate, facilities, sustainability, and enterprise asset management.

This partnership unites EBIZ's deep specialization in IBM TRIRIGA, now known as Maximo for Real Estate and Facilities (MREF), and IBM Envizi ESG and sustainability solutions with SMS's long-standing leadership in core IBM Maximo Enterprise Asset Management (EAM). The result is a single, coordinated delivery model that supports the full lifecycle of built assets, infrastructure, and sustainability initiatives on a unified IBM Maximo platform.

"Clients want a partner who understands the entire asset ecosystem, from corporate real estate and facilities to operations, maintenance, and sustainability reporting," said Jason Oney, President at SMS. "This partnership with EBIZ allows us to meet that demand with a unified team that speaks the same language, follows aligned delivery methodologies, and is deeply invested in client success."

"Organizations are increasingly looking to simplify their technology ecosystems while maximizing return on investment," said Tracy Jefferson, Director of Business Development at EBIZ. "By partnering exclusively with SMS, we are able to offer clients a seamless, integrated approach across real estate, facilities, sustainability, and asset management, without the complexity of managing multiple service providers."

SMS brings 27 years of experience delivering enterprise-scale Maximo EAM implementations, integrations, and optimization services across asset intensive industries. EBIZ complements this capability with market-leading expertise in facilities management, workplace strategy, real estate portfolio management, and ESG data and reporting.

Both SMS and EBIZ were founded nearly 27 years ago and have built reputations as trusted advisors known for deep IBM product knowledge, data-driven execution, and long-term client relationships. The partnership formalizes years of complementary collaboration and reflects a shared commitment to quality, innovation, and measurable business outcomes.

Key benefits of the SMS and EBIZ partnership include:

- Full coverage of the IBM Maximo Application Suite, including Real Estate & Facilities (MREF), and ESG reporting

- Reduced implementation risk through coordinated architecture, data, and integration strategies
- Improved time-to-value by eliminating handoffs between multiple vendors
- A single, aligned delivery team with deep domain and industry expertise

The partnership is immediately available to new and existing IBM Maximo customers seeking to modernize, consolidate, or expand their asset, facility, and sustainability platforms.

About eBusiness Strategies LLC (EBIZ)

EBIZ is a specialized consulting and implementation firm focused on IBM TRIRIGA / Maximo for Real Estate and Facilities (MREF), IBM Envizi, and enterprise data strategy. EBIZ helps organizations envision, enable, and evolve their real estate, facilities, and sustainability solutions through deep platform expertise, data governance, and outcome-driven delivery.
