

WHY IBM'S MAXIMO APPLICATION SUITE

TRANSITION FROM CMMS TO IBM'S MAS

Transitioning from a CMMS (Computerized Maintenance Management System) or spreadsheet-based maintenance management to a more advanced Enterprise Asset Management (EAM) system such as IBM's Maximo Application Suite (MAS) which offers numerous benefits. Here are some key advantages of IBM MAS you may want to consider.

WHY TRANSITION

IBM's MAS provides a centralized platform for managing assets across the enterprise, offering greater visibility and control over asset performance and asset life-cycle.

Improved Data Accuracy and Decision Making:

By using a single, integrated system like MAS, organizations can reduce data silos and inconsistencies, resulting in more accurate data that supports better decision-making and strategic planning.

Enhanced User Experience and Integration:

IBM offers a user-friendly interface and integration capabilities with other enterprise systems, MAS simplifies the user experience and allows for seamless data sharing across the organization.

Scale-ability and Flexibility:

MAS is designed to scale with the organization and adapt to a wide range of industries and operational needs, providing flexibility in meeting specific business requirements.

Improved Efficiency and Productivity:

Automating maintenance processes and workflows with MAS can significantly increase efficiency, allowing teams to accomplish more with fewer resources and reduce human error.

Real-time Monitoring and Reporting:

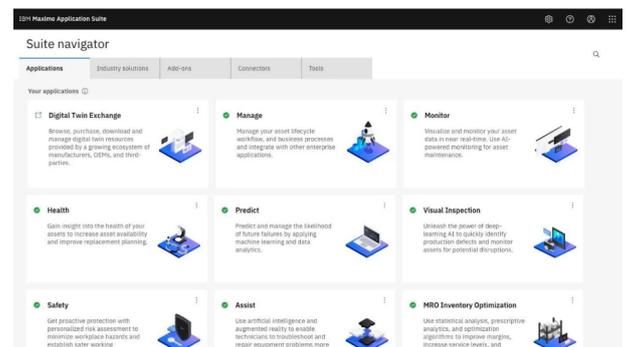

With MAS' real-time monitoring capabilities with its Monitor solution, organizations can proactively manage their assets and receive timely alerts and insights, enhancing responsiveness to potential issues before that lead to failures and unplanned downtime.

Regulatory Compliance and Risk Mitigation:

MAS helps in maintaining compliance with industry standards and regulations by providing audit-trails and enforcing standardized processes, which can further help in mitigating risks associated with asset failures.

Enhanced Predictive Maintenance:

MAS supports advanced analytics and predictive maintenance functionalities with Monitor and Predict applications included in the suite, helping organizations to predict when maintenance should be performed, thus reducing downtime and optimizing maintenance schedules.

SMS MIGRATION SERVICES

Unlock the Future of Asset Management with Strategic Maintenance Solutions' IBM MAS Migration Services

In the world of asset management, staying ahead means embracing cutting-edge technology that empowers your organization to operate efficiently and effectively. Strategic Maintenance Solutions offers a specialized IBM Maximo Application Suite (MAS) Migration Service, designed to seamlessly transition your operations from existing CMMS or EAM solutions to the unparalleled capabilities of IBM MAS. We will take you from concept and feasibility to development, verification and validation, and finally training and delivery of the end solution.

Why Choose SMS' Migration Services?

- Effortless Transition:**
Our team of experts ensures a streamlined and efficient migration process, minimizing downtime and maintaining business continuity, so your operations stay on track without missing a beat.
- Data Integrity and Integration:**
With meticulous attention to detail, we guarantee that your valuable data is transferred securely and accurately, preserving its integrity and enhancing its utility within the robust IBM MAS environment.
- Tailored Solutions:** We understand that every organization is unique. Our migration services are customized to meet your specific business needs, ensuring that the capabilities of IBM MAS are fully harnessed to your advantage.
- Expert Support and Training:**
Benefit from our extensive expertise and hands-on training that empower your team to leverage IBM MAS from day one, ensuring rapid adoption and maximum ROI.
- Accelerate Your Digital Transformation:**
Transitioning to IBM MAS opens the door to advanced analytics, predictive maintenance, and real-time monitoring. Our migration services position allows your organization to harness these and future innovations, driving efficiency, reducing costs, and enhancing decision-making.
- Compliance and Risk Management:**
Our comprehensive approach ensures that your migration aligns with industry standards and compliance requirements, effectively managing risks associated with such transitions.

Join SMS and IBM in Revolutionizing Asset Management

Embrace the transformative power of IBM MAS with confidence. Our migration services enable you to transition swiftly and securely from lesser CMMS and EAM systems, positioning your organization at the forefront of innovation and efficiency in asset management.

Contact Strategic Maintenance Solutions today and embark on a journey to unmatched operational excellence with IBM MAS.
